

## DDOT/Urban Forestry Administration Tree Watering Campaign

More than 4,000 street trees have been planted this season by DDOT's Urban Forestry Administration (UFA) as part of a District-wide effort to re-green DC.

### **Is there a newly planted street tree in front of your apartment, house, or business?**

Adopt a tree on your block and get a free “ooze tube” tree watering bag to fill every week or two from June to October!

#### **This is an ooze tube:**

#### **Why ooze tubes are great for watering trees!**

- Requires refilling every 1-2 weeks
- Allows air circulation to the trunk and soil
- Waters the tree slowly so that the ground can fully absorb

**To obtain an “ooze tube” and more information on how to care for your newly planted street trees, please contact:**
